Mon.-Fri., 9am-12pm & 1pm-4pm

Mon.-Fri., 9am-12pm & 1pm-4pm

Website: <http://extension.arizona.edu/yavapai>

Soil Testing (pH test only) performed by Extension office

- Free
- Bring samples to Extension office - 8 oz. dry soil in paper bag or Ziploc (not sealed)
- Results will be called, emailed, or U.S. mailed (provide S.A.S.E.)
- Soil tests performed weekly in Prescott and Camp Verde offices
- Extension office has a list of labs that test for other than pH; Texas A&M performs very reasonably priced, extensive soil tests. <http://soiltesting.tamu.edu>

Plant ID

Bring a sample, including as much of plant as possible (leaves on stem, flower, picture of overall plant are helpful). Plants like grasses almost always need flower to identify.

Plant Problems

Pictures are helpful, along with sample of the problem. Can email photos but Master Gardener may still ask for sample to be brought in.

Insect ID

Bring sample, in jar or Ziploc bag. Also helpful to bring piece of plant that it is found on if it is eating it.
